ENERGY-SAVING, FLEXIBLE, EFFICIENT

**Presentation quality
meets energy efficiency.**

SIRIUS®
ECOplus

SIRIUS® ECOplus – The bestselling service counter as self-service refrigerated unit.

The AICHINGER SIRIUS®3 counter series is the bestseller among service counters. The classic is now also available as a closed self-service refrigerated unit: SIRIUS® ECOplus combines energy efficiency with high presentation quality. The self-service refrigerated unit can be easily integrated into a counter system or, when the connection to the integrated refrigeration system is secured, it can also be placed free-standing in the fresh food area. With SIRIUS® ECOplus, appealing and sales-boosting fresh food areas can be designed with a perfect mix of service and self-service counters.

CONVERTIBILITY

It is not absolutely necessary for you to invest in a new self-service refrigeration unit. Our tried and tested SIRIUS® counter series can be converted to ECOplus. This ensures maximum investment security.

SAFETY

SIRIUS® ECOplus is operated with circulating air - the flow behavior guarantees high operational safety and temperature stability. The highly efficient refrigeration technology enables products with temperature requirements up to up to M0 and at an evaporation temperature $t_0 \text{ max } -6^\circ\text{C}$. In defined zones, it is also possible to present products such as minced meat, which require a product temperature of M0+ (-1 to 2°C).

ENERGY EFFICIENT

SIRIUS® ECOplus is up to 55 % more energy efficient compared to similar open refrigeration units. The modules therefore correspond to energy efficiency classes B to C.
